India-based Rabatex Industries, will showcase the latest and innovative weaving preparatory technologies, at the upcoming India ITME 2016 to be held from 3rd to 8th December 2016 in Mumbai.

The company will exhibit its high-speed Sample Warping Machine model RI 6001, primarily for production of samples and short production warp at very high production rate. The RI 6001 has a robustly constructed warping drum, suitable up to widths of 2400 mm and for warping lengths between 21 and 450 metres (depending on thread density) and suitable for yarn range from 5 to 500 Tex. The machine comes with a heavy duty rotational creel with a maximum creel capacity of 16 colours and is suitable of attaining maximum speeds of up to 1,200 metres per minute.

Its Sectional Warping Machine RI 112, which produces high quality warp beams with higher productivity, will also be displayed at the event. It comes with user-friendly advance software and data management, offering all online data of warping operations. It also offers graphical display of all events and breakages and also loss end memory control. Additionally, company's single end sizing machine RI 8001 will also be a part of the display. It offers 4, 8, 12 and 16 spindle configurations and produces sized yarn of the highest quality to ensure trouble-free and smooth weaving operations. The RI-8001 is suitable for cotton yarn in the range of 10's to 120's Ne and polyester yarn in the range of 30 to 210 deniers, with option of dry steam or electric heater drying system.

Also on showcase, will be the Rabatex Battery operated Warp Beam Carrier with Heald frame support VM 5003 is Beam Gaiting Trolley with a robust structure for lifting of beam with harness, dropper and Heald frame. The VM 5003 comes with a battery operated hydraulic power pack unit, transportation module with battery life for continuous working of 8 hours. Lastly, the Rabatex Cloth Roll Doffer Carrier Cradle VM 508 is designed to be compact and suitable for lifting and transporting a cloth roll in narrow gangways. The cloth roll cradle can be lowered up to the ground floor. The cloth roll on the weaving machine can also be directly lifted and transported by the VM 508.

"All our technologies, including those on display at ITME India are very robust and so require very less maintenance. We have developed these technologies through our in-house R&D team and go through rigorous tests before launching in the market," said **Haresh Panchal, Managing Director, Rabatex Industries**.
